

**WHAT IS CLAIMED IS:**

1. A ready-to-use composition for dyeing keratin fibers, comprising:
  - (i) at least one cationic direct dye chosen from compounds of formulae (I), (II), (III) and (III') below, and
  - (ii) at least one thickening polymer;
- (a) wherein said compounds of formula (I) are chosen from compounds of formula:

in which:

D is chosen from a nitrogen atom and a -CH group,  
R<sub>1</sub> and R<sub>2</sub>, which may be identical or different, are chosen from a hydrogen atom; a 4'-aminophenyl radical; and C<sub>1</sub>-C<sub>4</sub> alkyl radicals which can optionally be substituted with a radical chosen from -CN, -OH and -NH<sub>2</sub> radicals;  
or  
R<sub>1</sub> and R<sub>2</sub> may form, with each other or with a carbon atom of the benzene ring of formula (I), a heterocycle optionally containing a heteroatom chosen from

oxygen and nitrogen, which can be substituted with at least one radical chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals;

R<sub>3</sub> and R'<sub>3</sub>, which may be identical or different, are chosen from a hydrogen atom, halogen atoms, a cyano radical, C<sub>1</sub>-C<sub>4</sub> alkyl radicals, C<sub>1</sub>-C<sub>4</sub> alkoxy radicals and acyloxy radicals,

X<sup>-</sup> is chosen from anions,

A is chosen from structures A<sub>1</sub> to A<sub>19</sub> below:

*See also "List of Radicals"*

and

in which:

$\text{R}_4$  is chosen from  $\text{C}_1\text{-C}_4$  alkyl radicals which can be substituted with a hydroxyl radical, and

$\text{R}_5$  is chosen from  $\text{C}_1\text{-C}_4$  alkoxy radicals, and

wherein when  $\text{D}$  represents  $-\text{CH}$ , when  $\text{A}$  represents  $\text{A}_4$  or  $\text{A}_{13}$  and when  $\text{R}_3$  is not an alkoxy radical,  $\text{R}_1$  and  $\text{R}_2$  are not both a hydrogen atom;

(b) wherein said compounds of formula (II) are chosen from

compounds of formula:

in which:

*Sub a' cont'd*

R<sub>6</sub> is chosen from a hydrogen atom and C<sub>1</sub>-C<sub>4</sub> alkyl radicals,

R<sub>7</sub> is chosen from a hydrogen atom, alkyl radicals which can be substituted with a species chosen from a -CN radical and an amino group, and a 4'-aminophenyl radical, or forms, with R<sub>6</sub>, a heterocycle optionally comprising at least one heteroatom chosen from oxygen and nitrogen, which can be substituted with C<sub>1</sub>-C<sub>4</sub> alkyl radicals,

R<sub>8</sub> and R<sub>9</sub>, which may be identical or different, are chosen from a hydrogen atom, halogen atoms, C<sub>1</sub>-C<sub>4</sub> alkyl radicals, C<sub>1</sub>-C<sub>4</sub> alkoxy radicals and a -CN radical,

X<sup>-</sup> is chosen from anions,

B is chosen from structures B<sub>1</sub> to B<sub>6</sub> below:

and

in which:

$R_{10}$  is chosen from  $C_1-C_4$  alkyl radicals, and

$R_{11}$  and  $R_{12}$ , which may be identical or different, are chosen from a hydrogen atom and  $C_1-C_4$  alkyl radicals;

(c) wherein said compounds of formulae (III) and (III') are chosen from compounds of formulae:

in which:

$R_{13}$  is chosen from a hydrogen atom, C<sub>1</sub>-C<sub>4</sub> alkoxy radicals, halogen atoms and an amino radical,

$R_{14}$  is chosen from a hydrogen atom, C<sub>1</sub>-C<sub>4</sub> alkyl radicals or forms, with a carbon atom of the benzene ring, a heterocycle optionally containing an oxygen heteroatom and/or substituted with at least one radical chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals,

$R_{15}$  is chosen from a hydrogen atom and halogen atoms,

$R_{16}$  and  $R_{17}$ , which may be identical or different, are chosen from a hydrogen atom and C<sub>1</sub>-C<sub>4</sub> alkyl radicals,

$D_1$  and  $D_2$ , which may be identical or different, are chosen from a nitrogen atom and a -CH group,

$m$  is 0 or 1,

wherein when  $R_{13}$  is an unsubstituted amino group,  $D_1$  and  $D_2$  are both a

:

in which R' is chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals;

and

- and wherein said at least one thickening polymer is chosen from polymers comprising at least one sugar unit.

2. The composition according to Claim 1, wherein said keratin fibers are human keratin fibers.

3. The composition according to Claim 2, wherein said human keratin fibers are hair.

4. The composition according to Claim 1, wherein in formulae (I), (II), (III) and (III'), the C<sub>1</sub>-C<sub>4</sub> alkyl radicals and the C<sub>1</sub>-C<sub>4</sub> alkoxy radicals are chosen from methyl, ethyl, butyl, methoxy and ethoxy radicals.

5. The composition according to Claim 1, wherein said anions are chosen from chloride, methyl sulfate and acetate.

6. The composition according to Claim 1, wherein said halogen atoms of R<sub>3</sub>, R'<sub>3</sub>, R<sub>8</sub>, R<sub>9</sub>, R<sub>13</sub>, and R<sub>15</sub> are chosen from bromine, chlorine, iodine, and fluorine.

7. The composition according to Claim 1, wherein said at least one thickening polymer comprising at least one sugar unit is chosen from:

- (ii)<sub>1</sub> - nonionic guar gums;
- (ii)<sub>2</sub> - biopolysaccharide gums of microbial origin;
- (ii)<sub>3</sub> - gums derived from plant exudates;
- (ii)<sub>4</sub> - pectins;
- (ii)<sub>5</sub> - alginates;
- (ii)<sub>6</sub> - starches; and
- (ii)<sub>7</sub> - hydroxylalkylcelluloses and carboxyalkylcelluloses.

8. The composition according to Claim 7, wherein said

biopolysaccharide gums of microbial origin are chosen from scleroglucan gum and xanthan gum.

8 The composition according to Claim 7, wherein said gums derived from exudates are chosen from gum arabic, ghatti gum, karaya gum, gum tragacanth, carrageenan gum, agar gum and carob gum.

9 10. The composition according to Claim 1, wherein said at least one cationic direct dye of formula (I) is chosen from compounds of formulae (I 1) to (I 54) below:

least one organic solvent.

27  
28. The composition according to Claim 1, wherein said composition has a pH ranging from 2 to 11.

28  
29. The composition according to Claim 28, wherein said composition has a pH ranging from 5 to 10.

30. The composition according to Claim 1, wherein said composition further comprises at least one additional direct dye.

30  
31. The composition according to Claim 30, wherein said at least one additional direct dye is chosen from nitrobenzene dyes, anthraquinone dyes, naphthaquinone dyes, triarylmethane dyes, xanthene dyes and azo dyes.

31  
32. The composition according to Claim 1, wherein said composition further comprises at least one oxidation base chosen from para-phenylenediamines, bis(phenyl)alkylenediamines, para-aminophenols, ortho-aminophenols and heterocyclic bases.

32  
33. The composition according to Claim 32, wherein said at least one oxidation base is present in an amount ranging from 0.0005 to 12% by weight relative to the total weight of the dye composition.

33  
34. The composition according to Claim 33, wherein said at least one oxidation base is present in an amount ranging from 0.005 to 6% by weight relative to the total weight of the dye composition.

- 34*  
35. The composition according to Claim 32, wherein said composition further comprises at least one coupler chosen from meta-phenylenediamines, meta-aminophenols, meta-diphenols and heterocyclic couplers.
- 35*  
36. The composition according to Claim 35, wherein said at least one coupler is present in an amount ranging from 0.0001 to 10% by weight relative to the total weight of the dye composition.
- 36*  
37. The composition according to Claim 36, wherein said at least one coupler is present in an amount ranging from 0.005 to 5% by weight relative to the total weight of the dye composition.
- 37*  
38. The composition according to Claim 32, wherein said composition further comprises at least one oxidizing agent.
- 38*  
39. The composition according to Claim 38, wherein said at least one oxidizing agent is chosen from hydrogen peroxide, urea peroxide, alkali metal bromates, persalts and enzymes.
- 39*  
40. The composition according to Claim 39, wherein said persalts are chosen from perborates and persulphates.
- 40*  
41. The composition according to Claim 39, wherein said enzymes are chosen from peroxidases, lactases, and two-electron oxidoreductases.
- 41*  
42. The composition according to Claim 1, wherein said composition is present in an amount sufficient for lightening dyeing direct dyeing.

42. The composition according to Claim 1, wherein said composition further comprises at least one oxidizing agent.

43. The composition according to Claim 1, wherein said composition is in a form chosen from a liquid, a shampoo, a cream and a gel.

45. A process for dyeing keratin fibers, comprising applying a composition for the oxidation dyeing of keratin fibers to said keratin fibers and developing for a period of time sufficient to achieve the desired coloration, wherein said composition comprises:

(i) at least one cationic direct dye chosen from compounds of formulae (I), (II), (III) and (III') below, and

(ii) at least one thickening polymer;

(a) wherein said compounds of formula (I) are chosen from compounds of formula:

in which:

D is chosen from a nitrogen atom and a -CH group,

$R$ <sub>1</sub> and  $R$ <sub>2</sub>, which may be identical or different, are chosen from a

hydrogen atom; a 4'-aminophenyl radical; and C<sub>1</sub>-C<sub>4</sub> alkyl radicals which can optionally be substituted with a radical chosen from -CN, -OH and -NH<sub>2</sub> radicals; or

R<sub>1</sub> and R<sub>2</sub> form, with each other or with a carbon atom of the benzene ring of formula (I), a heterocycle optionally containing a heteroatom chosen from oxygen and nitrogen, which can be substituted with at least one radical chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals;

*Sub A 4 cont'd*  
R<sub>3</sub> and R'<sub>3</sub>, which may be identical or different, are chosen from a hydrogen atom, halogen atoms, a cyano radical, C<sub>1</sub>-C<sub>4</sub> alkyl radicals, C<sub>1</sub>-C<sub>4</sub> alkoxy radicals and acyloxy radicals,

X<sup>-</sup> is chosen from anions,

A is chosen from structures A<sub>1</sub> to A<sub>19</sub> below:

in which R' is chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals;  
and wherein said at least one thickening polymer is chosen from polymers  
comprising at least one sugar unit; and  
wherein said second composition comprises at least one oxidizing agent.  
49. A process for dyeing keratin fibers, comprising  
separately storing a first composition,

separately storing a second composition,  
 thereafter mixing said first and second compositions,  
 applying said mixture to said fibers, and  
<sup>a</sup>  
 developing for a period of time sufficient to achieve the desired coloration,  
 wherein said first composition comprises at least one oxidation base, and  
 at least one cationic direct dye chosen from compounds of formulae (I), (II), (III)  
 and (III') below:

(a) wherein said compounds of formula (I) are chosen from  
 compounds of formula:

in which:

D is chosen from a nitrogen atom and a -CH group,  
 R<sub>1</sub> and R<sub>2</sub>, which may be identical or different, are chosen from a  
 hydrogen atom; a 4'-aminophenyl radical; and C<sub>1</sub>-C<sub>4</sub> alkyl radicals which can  
 optionally be substituted with a radical chosen from -CN, -OH and -NH<sub>2</sub> radicals;  
 or  
 R<sub>1</sub> and R<sub>2</sub> form, with each other or with a carbon atom of the benzene ring of

formula (I), a heterocycle optionally containing a heteroatom chosen from oxygen and nitrogen, which can be substituted with at least one radical chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals;

R<sub>3</sub> and R'<sub>3</sub>, which may be identical or different, are chosen from a hydrogen atom, halogen atoms, a cyano radical, C<sub>1</sub>-C<sub>4</sub> alkyl radicals, C<sub>1</sub>-C<sub>4</sub> alkoxy radicals and acyloxy radicals,

X<sup>-</sup> is chosen from anions.

A is chosen from structures A<sub>1</sub> to A<sub>19</sub> below:

compartments, wherein a first compartment contains a first composition and a second compartment contains a second composition,

- wherein said first composition comprises at least one thickening polymer and at least one cationic direct dye chosen from compounds of formulae (I), (II), (III) and (III') below:

(a) wherein said compounds of formula (I) are chosen from compounds of formula:

in which:

D is chosen from a nitrogen atom and a -CH group,

R<sub>1</sub> and R<sub>2</sub>, which may be identical or different, are chosen from a hydrogen atom; a 4'-aminophenyl radical; and C<sub>1</sub>-C<sub>4</sub> alkyl radicals which can optionally be substituted with a radical chosen from -CN, -OH and -NH<sub>2</sub> radicals; or

R<sub>1</sub> and R<sub>2</sub> form, with each other or with a carbon atom of the benzene ring of formula (I), a heterocycle optionally containing a heteroatom chosen from oxygen and nitrogen, which can be substituted with at least one radical chosen from

C<sub>1</sub>-C<sub>4</sub> alkyl radicals;

R<sub>3</sub> and R'<sub>3</sub>, which may be identical or different, are chosen from a hydrogen atom, halogen atoms, a cyano radical, C<sub>1</sub>-C<sub>4</sub> alkyl radicals, C<sub>1</sub>-C<sub>4</sub> alkoxy radicals and acetyloxy radicals,

X<sup>-</sup> is chosen from anions,

A is chosen from structures A<sub>1</sub> to A<sub>19</sub> below:

and

in which:

R<sub>4</sub> is chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals which can be substituted with a hydroxyl radical, and

R<sub>5</sub> is chosen from C<sub>1</sub>-C<sub>4</sub> alkoxy radicals, and  
wherein when D represents -CH, when A represents A<sub>4</sub> or A<sub>13</sub> and when R<sub>3</sub> is not an alkoxy radical, R<sub>1</sub> and R<sub>2</sub> are not both a hydrogen atom;

(b) wherein said compounds of formula (II) are chosen from

compounds of formula:

in which:

R<sub>6</sub> is chosen from a hydrogen atom and C<sub>1</sub>-C<sub>4</sub> alkyl radicals,

R<sub>7</sub> is chosen from a hydrogen atom, alkyl radicals which can be substituted with a species chosen from a -CN radical and an amino group, and a 4'-aminophenyl radical, or forms, with R<sub>6</sub>, a heterocycle optionally comprising at least one heteroatom chosen from oxygen and nitrogen, which can be substituted with C<sub>1</sub>-C<sub>4</sub> alkyl radicals,

R<sub>8</sub> and R<sub>9</sub>, which may be identical or different, are chosen from a hydrogen atom, halogen atoms, C<sub>1</sub>-C<sub>4</sub> alkyl radicals, C<sub>1</sub>-C<sub>4</sub> alkoxy radicals and a -CN radical,

X<sup>-</sup> is chosen from anions,

B is chosen from structures B<sub>1</sub> to B<sub>6</sub> below:

in which:

R<sub>10</sub> is chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals, and

R<sub>11</sub> and R<sub>12</sub>, which may be identical or different, are chosen from a hydrogen atom and C<sub>1</sub>-C<sub>4</sub> alkyl radicals;

(c) wherein said compounds of formulae (III) and (III') are chosen from compounds of formulae:

in which:

$R_{13}$  is chosen from a hydrogen atom,  $C_1-C_4$  alkoxy radicals, halogen atoms and an amino radical,

$R_{14}$  is chosen from a hydrogen atom,  $C_1-C_4$  alkyl radicals or forms, with a carbon atom of the benzene ring, a heterocycle optionally containing an oxygen heteroatom and/or substituted with at least one radical chosen from  $C_1-C_4$  alkyl radicals,

$R_{15}$  is chosen from a hydrogen atom and halogen atoms,

$R_{16}$  and  $R_{17}$ , which may be identical or different, are chosen from a hydrogen atom and  $C_1-C_4$  alkyl radicals,

$D_1$  and  $D_2$ , which may be identical or different, are chosen from a nitrogen atom and a -CH group,

$m$  is 0 or 1,

wherein when  $R_{13}$  is an unsubstituted amino group,  $D_1$  and  $D_2$  are both a

-CH group and m is 0,

X<sup>-</sup> is chosen from anions,

E is chosen from structures E<sub>1</sub> to E<sub>8</sub> below:

and

E8 ;

in which R' is chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals;

wherein when m is 0 and when D<sub>1</sub> represents a nitrogen atom, E can be further chosen from structure E9 below:

E9 ;

in which R' is chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals;

-wherein said at least one thickening polymer is chosen from polymers comprising at least one sugar unit; and

- wherein said second composition comprises at least one oxidizing agent.

55. A multi-compartment dyeing kit, comprising at least two separate compartments, wherein a first compartment contains a first composition and a

second compartment contains a second composition,

- wherein said first composition comprises at least one cationic direct dye chosen from compounds of formulae (I), (II), (III) and (III') below:

(a) wherein said compounds of formula (I) are chosen from compounds of formula:

in which:

D is chosen from a nitrogen atom and a -CH group,

R<sub>1</sub> and R<sub>2</sub>, which may be identical or different, are chosen from a hydrogen atom; a 4'-aminophenyl radical; and C<sub>1</sub>-C<sub>4</sub> alkyl radicals which can optionally be substituted with a radical chosen from -CN, -OH and -NH<sub>2</sub> radicals; or

R<sub>1</sub> and R<sub>2</sub> form, with each other or with a carbon atom of the benzene ring of formula (I), a heterocycle optionally containing a heteroatom chosen from oxygen and nitrogen, which can be substituted with at least one radical chosen from C<sub>1</sub>-C<sub>4</sub> alkyl radicals;

R<sub>3</sub> and R'<sub>3</sub>, which may be identical or different, are chosen from a

hydrogen atom, halogen atoms, a cyano radical, C<sub>1</sub>-C<sub>4</sub> alkyl radicals, C<sub>1</sub>-C<sub>4</sub> alkoxy radicals and acyloxy radicals,

X<sup>-</sup> is chosen from anions,

A is chosen from structures A<sub>1</sub> to A<sub>19</sub> below:
